

Project 1: Test Cases for Automation on API token page

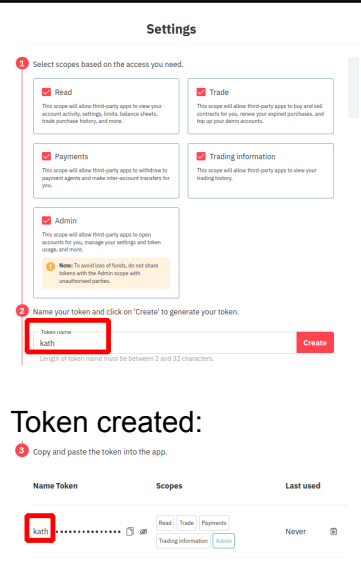

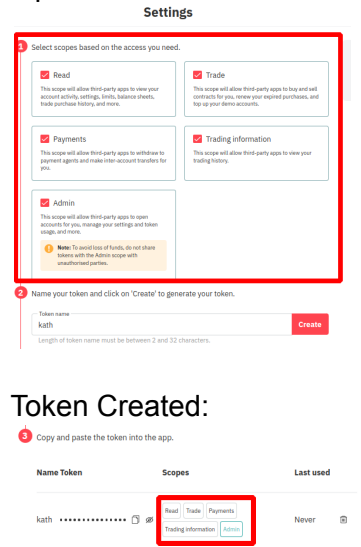

Test Case ID	Test Case Description	Test Data	Expected Result	Screenshot
1	Test if successfully login in to real account	-Email -Password	- Successfully login to real account	-
2	Test if account setting icon clickable	-	- “Manage account setting” icon is clickable - Redirected to “Personal details” page	<p>“Personal details” page:</p> 
3	Test if the “API token” tab is clickable	-	- “API token” is selected - Redirected to “API token” page	<p>“API token” page:</p> 

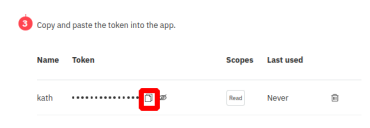

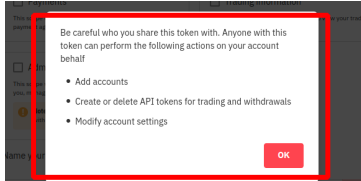

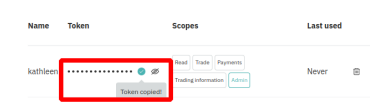

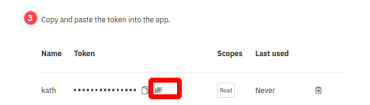

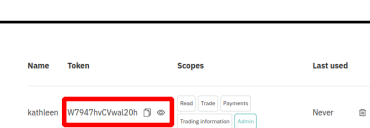

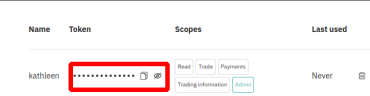

4	Test if the “create” button is clickable when non of the box in step 1 checked and the token name is empty	<ul style="list-style-type: none"> - No box is checked - Token name is empty 	- “Create” button in step 2 is not clickable	 <p>Settings</p> <p>1 Select scopes based on the access you need.</p> <p><input type="checkbox"/> Read This scope will allow third-party apps to view your account activity, settings, limits, balance sheets, trade purchase history, and more.</p> <p><input type="checkbox"/> Payments This scope will allow third-party apps to withdraw to payment agents and make inter-account transfers for you.</p> <p><input type="checkbox"/> Admin This scope will allow third-party apps to open accounts for you, manage your settings and token usage, and more. Note: To avoid loss of funds, do not share tokens with the Admin scope with unauthorized parties.</p> <p><input type="checkbox"/> Trade This scope will allow third-party apps to buy and sell contracts for you, renew your expired purchases, and top up your demo accounts.</p> <p><input type="checkbox"/> Trading information This scope will allow third-party apps to view your trading history.</p> <p>2 Name your token and click on 'Create' to generate your token.</p> <p>Token name Length of token name must be between 2 and 32 characters.</p> <p>Create</p>
5	Test if the “create” button is clickable when non of the box in step 1 checked and the token name is not empty	<ul style="list-style-type: none"> - No box is checked - Token name is not empty 	- “Create” button in step 2 is not clickable	 <p>Settings</p> <p>1 Select scopes based on the access you need.</p> <p><input type="checkbox"/> Read This scope will allow third-party apps to view your account activity, settings, limits, balance sheets, trade purchase history, and more.</p> <p><input type="checkbox"/> Payments This scope will allow third-party apps to withdraw to payment agents and make inter-account transfers for you.</p> <p><input type="checkbox"/> Admin This scope will allow third-party apps to open accounts for you, manage your settings and token usage, and more. Note: To avoid loss of funds, do not share tokens with the Admin scope with unauthorized parties.</p> <p><input type="checkbox"/> Trade This scope will allow third-party apps to buy and sell contracts for you, renew your expired purchases, and top up your demo accounts.</p> <p><input type="checkbox"/> Trading information This scope will allow third-party apps to view your trading history.</p> <p>2 Name your token and click on 'Create' to generate your token.</p> <p>Token name kath Length of token name must be between 2 and 32 characters.</p> <p>Create</p>

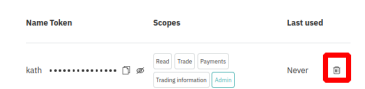

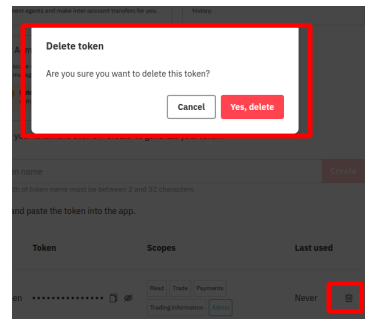

6	<p>Test if the “create” button is clickable and whether error message is shown when any of the box in step 1 is checked but input box in step 2 is empty</p>	<ul style="list-style-type: none"> - 1 to all boxes is checked - Token name is empty 	<ul style="list-style-type: none"> - “Create” button in step 2 is not clickable - Show error message “Please enter a token name.” 	
---	--	--	---	---

7	<p>Test if the “create” button is clickable when any of the box in step 1 is checked and input box in step 2 has valid token name</p>	<ul style="list-style-type: none"> - 1 to multiple box is checked - Valid token name - Length of token name is between 2 and 32 characters 	<ul style="list-style-type: none"> - “Create” button in step 2 is clickable 	 <p>The screenshot shows the 'Settings' page for creating a token. Step 1, 'Select scopes based on the access you need.', has three boxes: 'Read' (checked), 'Payments' (unchecked), and 'Admin' (unchecked). Step 2, 'Name your token and click on "Create" to generate your token.', shows a text input field with 'kath' and a red 'Create' button. A red box highlights the 'Create' button and the input field. A note below the input field states: 'Length of token name must be between 2 and 32 characters.'</p>  <p>This is a duplicate of the first screenshot, showing the same 'Settings' page with the same selections and token name 'kath'.</p>
---	---	---	--	--

8	Test if the “create” button is clickable and whether error message is shown when any of the box in step 1 is checked and input box in step 2 has invalid token name	<ul style="list-style-type: none"> - 1 to multiple box is checked - Invalid token name - Length of token name is not between 2 and 32 characters 	<ul style="list-style-type: none"> - “Create” button in step 2 is not clickable - Show error message “Length of token name must be between 2 and 32 characters.” or “Maximum 32 characters.” 	
9	Test if the token is created	-	- Token created successfully	
10	Test if the created token name is as same as the token name inputted in test case 9	<ul style="list-style-type: none"> - 1 to multiple box is checked - Valid token name 	- Created “NameToken” should be the same as the inputted token name in test case 9	Input:

				
11	Test if the created token's scopes is same as the scope selected in test case 9	<ul style="list-style-type: none"> - 1 to multiple box is checked - Valid token name 	<ul style="list-style-type: none"> - The scopes selected should be same as the scopes checked in test case 9 	

12	Test if the created token's "copy" icon is clickable	- "copy" icon is visible	- "copy" icon in step 3 is clickable	 <p>Copy and paste the token into the app.</p> <p>Name Token Scopes Last used</p> <p>kath [Copy] [Read] Never [Share]</p>
13	Check whether there is any popup window after "copy" icon is clicked	-	- Show popup window	 <p>Be careful who you share this token with. Anyone with this token can perform the following actions on your account behalf:</p> <ul style="list-style-type: none"> Add accounts Create or delete API tokens for trading and withdrawals Modify account settings <p>OK</p>
14	Check if after "OK" button is clicked is there any message show that token is copied	-	- A message "Token copied!!" is shown	 <p>Name Token Scopes Last used</p> <p>kathleen [Copy] [Trade] [Payments] [Trading information] [Admin] Never [Share]</p> <p>Token copied!</p>
15	Test if the created token's "hidden" icon is clickable	- "hidden" icon is visible	- "hidden" icon in step 3 is clickable	 <p>Copy and paste the token into the app.</p> <p>Name Token Scopes Last used</p> <p>kath [Hidden] [Read] Never [Share]</p>
16	Check whether the token value is shown after "hidden" icon is clicked once	-	- Show token value	 <p>Name Token Scopes Last used</p> <p>kathleen W7947hvCvval20h [Hidden] [Read] [Trade] [Payments] [Trading information] [Admin] Never [Share]</p>
17	Check whether the token value is hided after "hidden" icon is clicked twice	-	- Hide token value	 <p>Name Token Scopes Last used</p> <p>kathleen [Hidden] [Read] [Trade] [Payments] [Trading information] [Admin] Never [Share]</p>

18	Test if the created token's "delete" icon is clickable	- "delete" icon is visible	- "delete" icon in step 3 is clickable	 <p>The screenshot shows a table with columns: Name Token, Scopes, and Last used. A token named 'kath' is listed with scopes 'Read', 'Trade', and 'Payments'. The 'Last used' column shows 'Never'. A red box highlights the delete icon (a trash can) next to the token name.</p>
19	Check whether there is any popup window after "delete" icon is clicked	-	- Should pop up a window to ask for confirmation	 <p>The screenshot shows a 'Delete token' popup window with the text 'Are you sure you want to delete this token?'. It has two buttons: 'Cancel' and 'Yes, delete'. A red box highlights the entire popup window. Below the popup, the same token management interface is visible, with the delete icon still highlighted by a red box.</p>
20	Test if after "Cancel" button is clicked, is the token not deleted	-	- Token should not be deleted	-
21	Test if after "Yes, delete" button is clicked, is the token deleted	-	- Token should be deleted	-
